The following is an examiner's statement of reasons for allowance:

Claims 1-26 are allowed because the prior art of record does not disclose or suggest a method or apparatus for finding the boundary between words in a data stream of data bits, including determining the sequence of bits defining a word, selecting a data signal defining a word boundary, adding the word boundary with the bits of the data word, serializing the latter, sending out in parallel with the data bits a bit clock synchronized with the data bits, causing the bit clock to maintain a constant logic level, and determining the word boundary by sensing the word boundary while the bit clock is at a constant logic level.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
